PARADOR

living performance

PARADOR

Every day performance

Living spaces are an expression of our individual attitude to life and of our own individual demands. For us, making high demands means having an awareness for quality. At Parador, we unite this awareness for quality with a sense for the classic and a flair for the time in which we live. The result is a wide spectrum of products, whose confident style down to the last detail is equally convincing as the natural impression of their material.

Philosophy

We have developed a value compass that guides us through all our decisions. It determines how Parador acts and gives what we do a sense of reliability. This applies to our company and our products, through which our inner attitude is expressed: we live for products that make any home the most beautiful home in the world. Attention to detail, inventiveness and a willingness to develop go hand in hand with our products. We work every day to delight demanding customers.

Inspiration

Many people love and feel the inspiration behind products. That is why we expand energy and commitment to create new possibilities and realise convincing products. Developments from architecture and interior design that provide impetus, a feel for trends, stimuli from lifestyle, handcraft and art repeatedly inspire our product developers and designers to come up with new ideas. This is how creative design, installation patterns and finishes emerge, which allow our products to become trendsetters in flooring design.

Design

For us, design is an expression of personality: it places the focus on individualism and independent ideas. Imaginative graphic motifs and decors open up an unlimited scope for creativity with uncompromising production perfection. Our internal design team and the collaboration with outstanding personalities from the international design scene are a guarantee of this scope. The result is convincing and unusual products that underline Parador's claim as a creative leader.

Quality

Parador offers premium quality „Made in Germany“. Our many years of experience provides the foundation for this combined with the relentless drive to further develop our expertise in all relevant areas. Customers can see the quality of our ClickBoards and decor panels by the brilliance of our light-fast decors. Our products are suitable for damp rooms and easy to assemble. These properties symbolise the long-term character of Parador products for the perfect design of walls, ceilings and loft extensions.

Materiality

Parador products for walls and ceilings are made virtually from one hundred per cent wood. Together with high density wood fibreboards, the decor papers enable high quality timbers to be interpreted authentically. But other materials, such as stone or concrete, can also be found among our true to nature decors with their different formats, installation and joint patterns.

Technology

Parador ClickBoard and Parador wall and ceiling panels are distinguished by functional composition and intelligent technology. Our patented click mechanism guarantees an easy processing method; different joint variations offer a wide spectrum of various design options. Different widths and installation-friendly formats are matched to the various applications of walls, ceilings and loft extensions to ensure easy handling.

Health in the home

Parador wall and ceiling products are low on emissions and allergens and ensure pleasant indoor conditions. We are happy to demonstrate this by only using materials that are healthy for the home. Test certificates issued by the LGA and Blue Angel give our customers the required peace of mind. Parador ClickBoard and Parador wall and ceiling panels are very durable and easy to clean, making them perfect for households with pets, children and allergy sufferers.

Sustainability

As a traditional wood processing company, we hold our environment in the highest esteem. For us, living with a certain quality standard in the present must go hand in hand with responsibility to conserve the planet for future generations. We stand up to this responsibility with products that set standards in terms of ecology with the materials used and their processing, production, packaging and also logistics. What is more, we have been actively committed to conserving the environment for years.

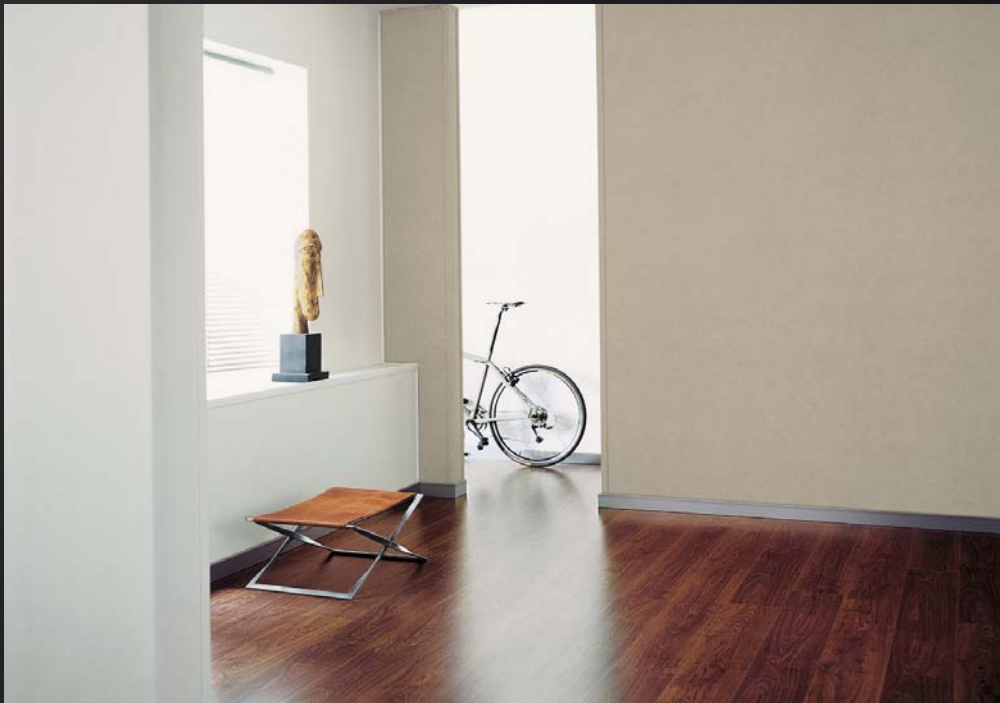

Product Lines

The standards of modern architecture and renovation place different challenges on us in terms of the design and function of walls and ceilings. For this reason, Parador provides two product lines. Parador ClickBoard and Parador decor panels turn wall and ceiling areas from architectural necessities into functional and also highly expressive elements of your furnishing style – and hence provide the right product for every room and requirement.

ClickBoard

The creative assortment

No matter whether you are creating large areas of walls, ceilings and sloping roofs or deliberately accentuating individual areas: with its easy handling and installation-friendly formats in attractive decors and surface textures, ClickBoard is the intelligent choice for almost any creative need.

Decor panels

The versatile assortment

Parador decor panels give walls and ceilings an individual charm and at the same time are exciting multifunctional talents. The spectrum of decors ranges from perfect wood imitations through to extravagant, classic patterns. Panels are suitable for ceilings, loft extension or facing formwork. This makes panels the ideal companion for a wide range of creative needs.

Wall / Ceiling Quality with system

ClickBoard product features

Suitable for damp rooms

Due to a swell-resistant core board and a moisture-repellent reverse side, ClickBoard can also be used in kitchens and bathrooms. Not for use where water lodges.

Suitability for light fittings

Recessed lights can be used without hesitation due to the heat resistance of ClickBoard.

Lightfast

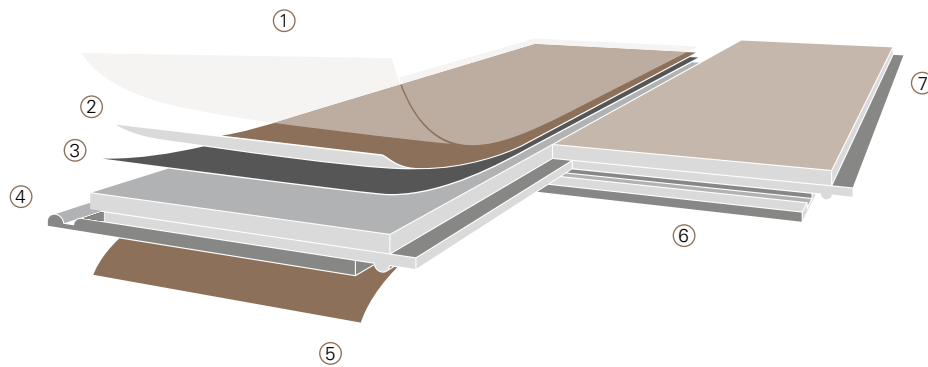

Good light fastness in accordance with DIN EN ISO 4892-2 prevents fading due to sunlight.

Safe Lock®

Due to the patented click mechanism with Safe-Lock® profile, the panels click in place without any problem and can therefore be easily joined together.

Composition of ClickBoard

- ① Highly wear-resistant top layer made of melamine resin coating with embossed texture
- ② Decor layer printed with organic dyes
- ③ Barrier paper

- ④ Safe-Lock® profile
- ⑤ Moisture-repellent reverse side
- ⑥ Special swell-resistant core board
- ⑦ Renovation-friendly due to low installation height

More than a surface

With a variety of decors and textures, Parador offers the right product for walls and ceilings for every room. Moderately rough surfaces in fibre and fine plaster, satin finishes, perfect wood finishes with brushed top sides and decors with shimmering stripes give the designs depth and turn them into a tangible experience.

Pine light brushed

Silhouette gloss

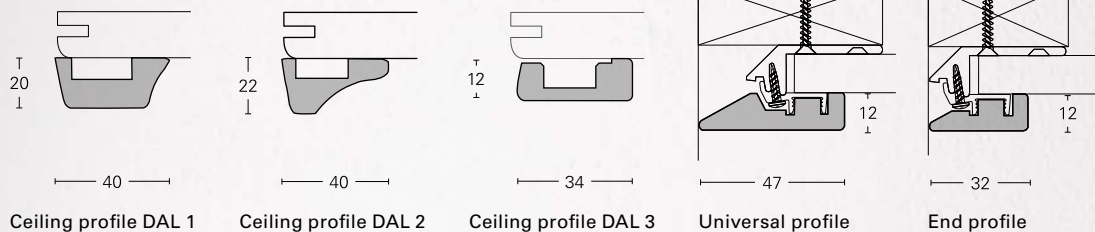

Stripes white

Perfect finish

Parador offers a wide selection of profiles and rails for ClickBoard as well as ceiling profiles, special profiles and external and internal corners for decor panels, which help to make finishes and transitions effortless. Different profile shapes and decors enable the perfect match to wall and ceiling areas. The patented clip technology stands for easy assembly: the profiles are pushed onto clips and can easily be removed at any time.

THE MAGAZINE FROM **PARADOR**

living performance

Setting standards. Practising responsibility.

As a traditional wood processing company, we are aware of our particular responsibility for the environment and towards handling natural resources in a sustainable manner. Active reforestation and innovative product chains characterise the production at Parador. With our expertise, we are also able to offer decor papers made completely of recycled materials – or from timbers from sustainable forestry programmes. Our products are regularly tested by independent institutes for their environmental impact and have been found to be good. In order to meet our high ecological and quality standards, we only develop and produce them in Germany. In this way we ensure that Parador products for wall, ceilings and loft extensions not only meet our quality and sustainability claims all along the line, but in terms of work conditions too, Parador produces in a fair and just manner.

Parador also supports the Plant-for-the-Planet initiative, which sends a signal for climate justice worldwide through tree-planting actions. Parador sponsors the numerous children's academies, where young participants are trained to become ambassadors for climate protection.

Art of living meets perfor- mance demand

For us, the art of living is an appreciation of beauty and to create inspiration out of it at any moment in time.

Performance is a permanent feature of our life. Day after day, we demand performance. Delivering daily performance requires solid ground beneath our feet.

You can find more information about us, our standard of quality and design and about our assortments on the Internet under: www.parador.de. If you have any questions, we are happy to help you or you can contact one of our many Parador dealers. We also welcome every visit to our Facebook page www.facebook.com/parador.
